# IRSS 2016 Election - Vision Statements

## Steering Committee Chair

### Hung Son Nguyen
Warsaw University, Poland
http://www.mimuw.edu.pl/~son/

Rough sets = More with less
- More information and knowledge from less (reduced) data;
- More quality and prestige of the conferences on rough sets, less acceptance rate;
- More expansion of rough sets into other branches in AI without much resource increase;
- More global cooperations and joint research grants, less close and local groups.

### Guoyin Wang
Chongqing University of Posts and Telecommunications, China

According to the Bylaws of IRSS, the major tasks of the Chair of Steering Committee are to appoint other SC Members, maintain their list and e-mail addresses, and act as a liaison between Steering Committee and Executive Board. So, if appointed I will do my best to appoint suitable steering committee members, work together with them to push the development of rough set community, support and cooperate with Executive Board.

I believe that rough set theory is still in its preliminary stage of development. The international rough set society need to grow quickly. Except for the tasks required by the IRSS Bylaws, I am going to contribute in the followings:
1. Encourage further inclusion of new researchers into IRSS.
2. Develop international cooperation on rough set theory and its applications.
3. Develop the friendship of rough set community and other communities.
4. Help to organize more conferences/workshops and special sessions on other conferences.
5. Help to launch new rough set journals.
6. Introduce rough set theory to more countries.
